HOW IT ALL STARTED...

SKINCARE vs. FITNESS

TEXT

EXACTLY HOW YOUR SKIN CHANGES IN YOUR 40S, 50S, AND 60S

by Chanel Vargas

Skin is the most visible marker of aging. The signs may be noticeable as early as your 20s, but **the biggest changes typically happen in your 40s, 50s, and 60s.** And while **some causes can't be helped—the intrinsic deterioration of your skin cells over time**—how you live your life, from the amount of time you spend in the sun to how much you drink to your stress levels, is reflected in your skin.

Of course, no two people are alike. **Genetics, environment, skin type, and hormone changes all affect maturing skin and how it ages.** *"We all go through the same aging process, but we go through it at different times and in different periods of our lives,"* said Tomi Lee Wall, MD, a board-certified dermatologist.

HOW DOES YOUR SKIN CHANGE IN YOUR 40S?

Your 40s are a transitional time, when **your skin's levels of collagen—a protein that makes up much of our skin and other connective tissue—drop**, and its texture and color take on new characteristics. As a result, you might **begin to notice thinner, saggier skin; hyperpigmentation; or wrinkles**—all trends that will continue into your 50s, 60s, and beyond.

TEXT

If you're looking to minimize signs of aging in your 40s, you might start thinking about procedures like laser treatments and chemical peels, which can boost your collagen production, but **the best place to start is with the rest of your body**, according to Dr. Wall. **You'll want to get enough sleep to allow your body to regenerate your skin cells; eat foods rich in antioxidants to supply your skin with nutrients that protects against UV radiation; and minimize stress to keep your cortisol levels low, too much of which can lead to increased oil production that clogs pores and leads to inflammation and acne.**

MOTIVATIONS

ừ, e mới gặp lại nyc sau hơn 3 năm

hồi xưa trông đáng yêu lắm mà giờ trông nó già đi kinh khủng

thời gian thật là đáng sợ

1990

2019

MOTIVATIONS

Someone with a problematic skin?

I do skincare, but my skin doesn't care

MOTIVATIONS

Someone with a flawless complexion?

- the **prevention is better than cure** principle, esp. when it comes to **wrinkles**, **hyperpigmentation** & **acne scars**

Tung Nguyen Vu Ho chắc khi nào e về cho em đăng kí 1 suất chứ dạo này da em rạn như bà đẻ, khô và ngứa nữa. Bh mới bắt đầu tập tành loay hoay đi thử dưỡng ẩm mà k biết loại gì tốt ạ. kkk

MOTIVATIONS

- Guys & skin care in a metrosexual world

- According to a survey conducted in the **United States**, **75% of women and 60% of men** reported using skincare products regularly.

In 2023, Europe held the largest share of 32% in men skin care products market. This was brought on by men's high consumption of high-end skincare and shave care products in Germany, Italy, and the United Kingdom. There has been a noticeable change in European attitudes regarding men's care and grooming. The idea that skincare is essential to general wellness and self-care is becoming more widely accepted.

MOTIVATIONS

thành phần của 1 lọ kem dưỡng như thế này:
 Iron oxides (CI-77499), cyclopentasiloxane,
 isopropyl palmitate, dimethicone, butylene
 glycol, cyclomethicone, caprylic/capric
 triglyceride, mica & titanium dioxide & silicic
 acid & iron oxide & tin oxide, glycerin, CI
 77480(gold 24k), olea europaea (olive) fruit
 oil, simmondsia, chinensis (jojoba) seed oil,
 prunus amygdalus dulcis ycerin, CI 77480 (gold
 24k), ol (perfume), cera alba (beeswax), borago
 officinalis (borage) seed oil, oenothera biennis
 (evening primrose) oil, silt (dead sea mud)
 extract, anthemis nobilis (chamomile) flower
 oil, hyaluronic acid, niapetyl gold (niacinamide
 (vitamin b3) & water & palmitoyl hexapeptide-
 19 & phenoxyethanol & ubiquinone & lepidium

PRICING

You **get what you pay for**? → *watch an annotation clip*

Slide No 14 PRICE JUSTIFICATIONS

- product texture & fragrance, packaging, and esp. advertisement
- so-called “star” ingredients:
 - gimmicks
 - quantity inadequacy

recharge the skin's electrical balance with pure platinum to protect the skin's DNA, and replenish moisture

PRICING

- *Other problems*
 - inadequate application
 - false security
 - high risks of fake products

Nếu không so sánh với màu sắc của serum xịn thì có lẽ, người ta vẫn không biết mình đang cầm trên tay chai serum fake. Hậu quả của việc bôi trát mỹ phẩm fake lên mặt là làn da sẽ bị phá hủy, không ít thì nhiều.

Dù không "bùng hàng" nhưng việc những kẻ giả mạo ship cho khách hàng giả là điều rất dễ xảy ra. Với những thủ đoạn tinh vi, bên lừa đảo có thể dán cả tem mác xịn sò rồi ngụy trang đó là hàng thật. Nếu chưa từng cầm trên tay sản phẩm của Estee Lauder, người ta sẽ dễ dàng tin rằng đó là hàng xịn chính hãng.

FOOD FOR THOUGHT

Miracle Broth & the story of astrophysicist Max Huber

GLOBAL AVERAGE PRICE

USD 174.88 per 1oz or **30ml**

↑ Highest: 🇺🇸 United States, Illinois: USD 180.00

↓ Lowest: 🇹🇼 Taiwan, Taipei: USD 169.75

MARKET SEGMENTATION

- **Estés Lauder**: La Mer, Prescriptives, Clinique and The Ordinary
- **L'Oreal**: Lancôme, Biotherm, Vichy, La Roche-Posay & The Body Shop

“We have no problem taking an amazing formula and taking out the most expensive parts, then repackaging it for a cheaper product”
(De Lemos, dermatologist)

The “cơm rang” metaphor

→ *how to* **SỐNG ẢO**?

FOOD FOR THOUGHT

Market segmentation by age, gender and body part.

- A ~~full set~~ of products?
- *Exceptions*: pregnant women

BACK to the clip

Slide No 19 ORGANIC INGREDIENT

My product contains this really interesting botanical and natural ingredient → the emotional pull of natural ingredients

topical application ≠ digestion ~~safer~~ ?

Slide No 20 ORGANIC INGREDIENT

- Problems
 - concentration
 - natural orientation
 - preservation
 - necessary conditions
 - E.g., AHA found in sugarcane, fruit, milk & willow bark extracts

FOOD FOR THOUGHT

topical application ≠ digestion ≠ skin nourishment

→ *discuss a reading on drinking collagen*

DOES DRINKING COLLAGEN SUPPLEMENTS ACTUALLY DO ANYTHING FOR YOUR SKIN? *by Jessica Cruel*

Collagen supplements claim to make skin look younger. We asked the experts.

When I first started to see collagen pills and powders coming across my desk about a year ago, I thought, this is total beauty BS. But the collagen supplements didn't stop coming, and then the trend hit the mainstream. Now some of my friends are stirring collagen supplements into their coffee and smoothies. That's when I decided to **do a little more digging** to see if drinking collagen can really give you younger-looking, firmer skin. Turns out, my first reaction wasn't so off the mark.

TEXT

As a beauty editor, I know that **collagen is an important building block of healthy skin**. “*Collagen is the main structural protein in the skin, giving it strength and shape,*” says dermatologist Joshua Zeichner, M.D., director of cosmetic and clinical research at Mount Sinai Hospital. “***Collagen is like the frame of your mattress, while elastin is the springs and hyaluronic acid is the padding.***” Like most things in the skin, **collagen diminishes as we age**, which is why skin can start to droop and sag. Around age 30, natural collagen production starts to slow down. I can totally understand why some people are pouring the powders in order to stop this from happening. But, in general, beauty supplements **don’t live up to the hype**, so I wasn't confident these would, either.

TEXT

Doctors aren't sold on the science of collagen supplements. *"Supplements are not well regulated,"* says Dendy Engelman, M.D., a dermatologist in NYC. *"so you can pretty much claim a lot of things that aren't **substantiated** in science or in proof."* Why would these collagen supplements — drinks that cost \$11 to \$30 per bottle or pills and powders that can run up to \$50 — be different?

Dr. Zeichner thinks they're not. He guesses that while they could offer some marginal (and indirect) help, **the collagen you're eating or drinking is almost definitely not getting to your skin.** *"Collagen is broken down into amino acids in your gastrointestinal tract after being ingested,"* he tells SELF. *"It is unlikely that any whole collagen makes it to your bloodstream. However, amino acids may, and they **serve as the building blocks for healthy skin cell functioning.** So, ingestible collagen may provide an **indirect benefit to the skin.**"*

TEXT

There is evidence that chains of amino acids can make it to the bloodstream after ingesting collagen, if the ingredient is in a form that can be broken down and absorbed by your body. But that doesn't mean they make it from there to your skin. Zhaoping Li, M.D., director and division chief at the UCLA Center for Human Nutrition, doesn't think it's particularly likely that your skin is going to be getting much help. She explains that **the amino acids derived from breaking down ingested collagen (like any other protein you might eat) are distributed throughout the body based on which area needs them the most.** Major muscles like the heart, diaphragm, and brain are **the first on the list** since they are necessary to function. **Skin is a much lower priority.** *"If you have a deficiency, then your skin will get it," says Dr. Li. "If you don't have a deficiency, then your skin won't get it."* And chances are that if you eat a decently healthy diet, you don't have a deficiency, even if your skin is significantly less plump than it used to be.

Dr. Li says **elderly patients may be deficient in collagen** and therefore see some benefit from ingestible supplements.

TEXT

Since supplements aren't hugely effective unless your collagen supply is already low, it's better to take preventive action with topical products. But note: Creams and serums that claim to include collagen are not very useful. ***"The collagen molecule in topical form is very big, so it's hard to be absorbed through the epidermis and get to the dermis where it needs to live,"*** says Dr. Engelman.

TEXT

Instead, look for products that can protect the collagen you have from breaking down or help your cells create more collagen naturally. **“Daily sunscreen protects collagen to keep the skin foundation as strong as possible, and topical antioxidants are like fire extinguishers that put out inflammation that cause damage to collagen,”** says Dr. Zeichner.

Retinol can help support collagen production. **“Vitamin A derivatives like retinol and retinoids send nuclear signaling to the cell that up-regulate the formation of collagen,”** says Dr. Engelman. “It’s like kicking the hamster wheel saying, ‘Hey, you need to work harder and make more collagen for us.’”

The takeaway: Sipping on collagen supplements daily isn't a reliable route to better skin. You're **better off using sunscreen and retinol on a regular basis.**

FOOD FOR THOUGHT

Drinking collagen vs. topical application of peptide products?
vs. Laser & micro-needling

FOOD FOR THOUGHT

topical application ≠ digestion ≠ skin nourishment

– *An exception: probiotics & prebiotics*

30 ml

**Fermogenesis
& rose cells**

14.000.000đ

- **in-vitro** vs. **in-vivo**
- **Peptide** (a compound of amino acids):
 - **in-vitro**: boost collagen production
 - **in-vivo**: large molecule size, short shelf life, interference tendency

TEXT

HOW FAKE SCIENCE SELLS WELLNESS *by Rina Raphael*

Dubious claims in product marketing are everywhere. Don't fall for them.

You can't browse a grocery store or pharmacy without being subject to flashy labels that promote health benefits. In the beverage aisle, for example, you might find "prebiotic" sodas that supposedly support "gut health." In the beauty department, you'll see "medical-grade" serums, "probiotic" facial creams and "skin detoxing" treatments. Go to the supplements section for promises of "immunity support," "hormone balance" and "energy enhancement," among other things.

Marketers have been **using scientific-sounding buzzwords to sell products for centuries**. But it's becoming more common, said Timothy Caulfield, a research chair in health law and policy at the University of Alberta. Mr. Caulfield coined the term "**scienceploitation**" to describe how brands borrow language from emerging areas of science to market unproven products.

Scienceploitation crops up in far more places today than ever before, including in search results, on social media platforms and from influencers, Mr. Caulfield said. Consumers are often inundated with confusing options as more companies position themselves as healthy. **Buyers are prioritizing scientific evidence but they can't always separate fact from fiction:** A 2021 study suggested that people who trust science were more likely to share false claims that contained scientific references than claims that didn't.

BACK to the clip

FOOD FOR THOUGHT

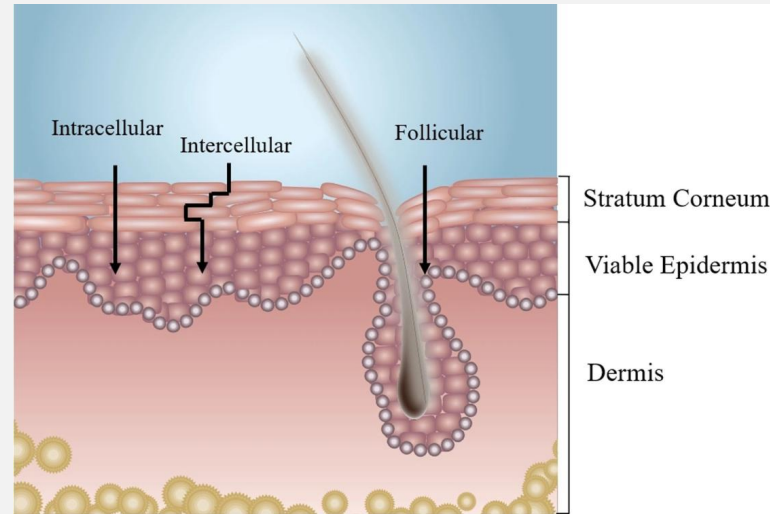

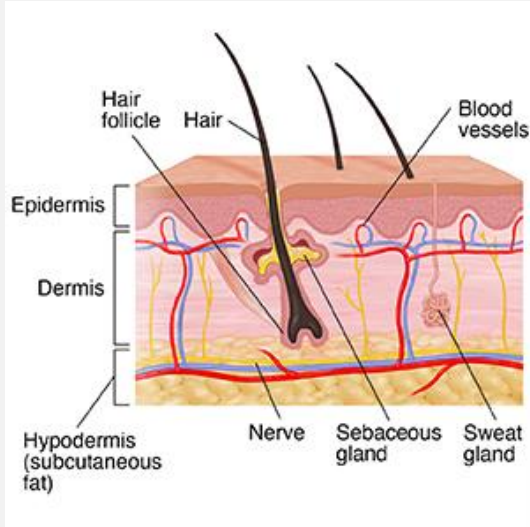

When the high cost of skin care products should be justifiable?

Research & patent

Delivery technologies

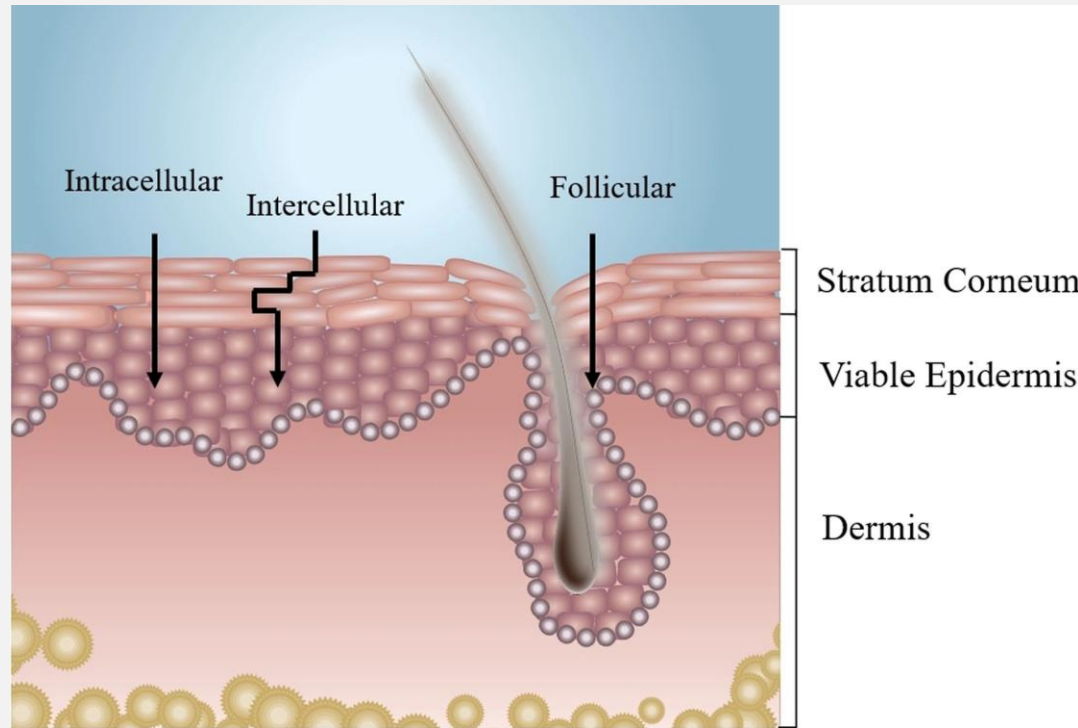

Preservation technologies

PENETRABILITY

- **Epidermis**
 - **Stratum corneum** on top: mostly keratin with surrounding lipid layers as a water-resistant protection barrier
 - **Melanocytes** (skin cell that produces melanin) at the base
- **Dermis**: collagen, elastin & hyaluronic acid
- **Hypodermis**: the subcutaneous fat layer

PENETRABILITY

- **Intracellular** pathway: most direct but challenging
 - **Follicular** pathway: the easiest but most limited
- **Interstitial** pathway: the most common pathway

BIOAVAILABILITY

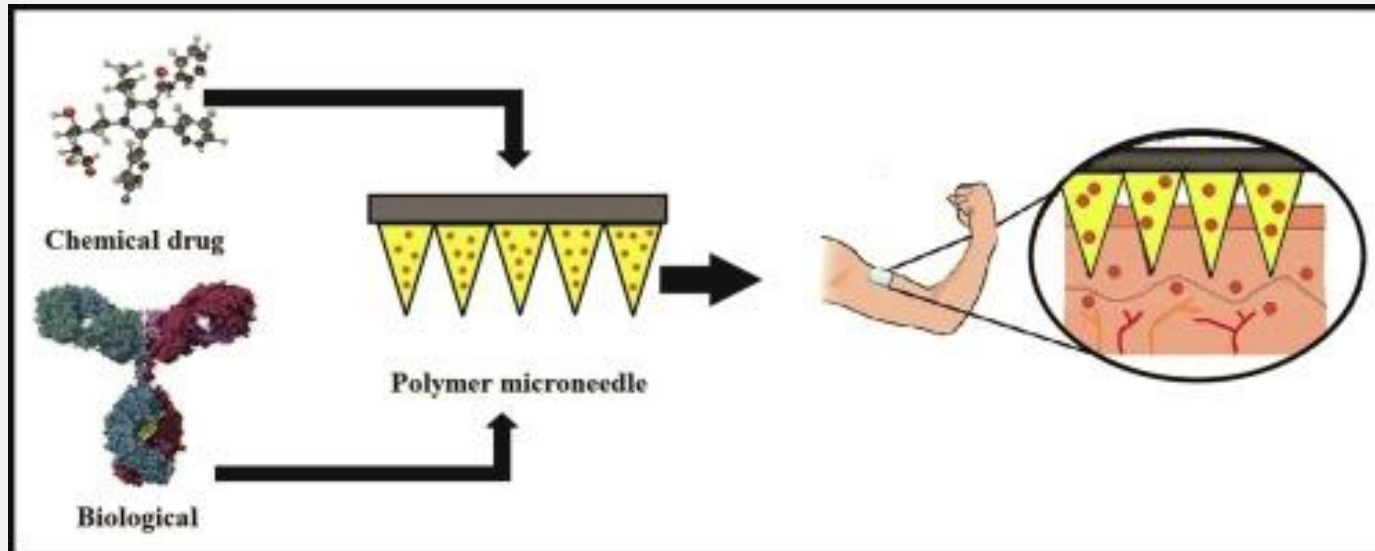

- Penetration rate for a cosmetic active to reach its site of action (usually the lower epidermis)
 - Benefit/risk ratio: superior bioavailability for active ingredients vs. minimal irritation by other formulation ingredients
- Factors
 - Solubility
 - lipid-soluble vs. water-soluble: Vitamin E vs. Vitamin C (L-Ascorbic) → Vitamin C (THD Ascorbate)
 - molecular size/weight
 - stability (esp. in exposure to light and air)
 - retinol, peptides and vitamins

PENETRATION ENHANCERS

- Favorable conditions: skin hydration, correct pH level, skin temperature etc.
- Conventional methods of using emulsifiers and osmolytes for stability and penetration
- Nano technology: chemical engineering to create nano-particles for size
 - Microencapsulation: an active ingredient is encased by microscopic capsules for stability and penetration
- Combination of physical penetration (lasers, micro-needling) and delivery of actives → *watch sample clips*

PENETRATION ENHANCERS

- patch of dissolving polymeric micro-needles + active

REVISIT DeAura...

thành phần của 1 lọ kem dưỡng như thế này: Iron oxides (CI-77499), cyclopentasiloxane, isopropyl palmitate, dimethicone, butylene glycol, cyclomethicone, caprylic/carpric triglyceride, mica & titanium dioxide & silicar & iron oxide & tin oxide, glycerin, CI 77480(gold 24k), olea europapea (olive) fruit oil, simmondsia, chinensis (jojoba) seed oil, prunus amygdalus dulcis ycerin, CI 77480 (gold 24k), ol (perfume), cera alba (beeswax), borago officinalis (borage) seed oil, oenothera biennis (evaea oprimrose) oil, silt (dead sea mud) extract, anthemis nobilis (chamomile) flower oil, hyaluronic acid, niapeptygold (niacinamide (vitamin b3) & water & palmitoyl hēapeptide-19 & phenoxyethanol & ubiquinone&lepidium sativum sprout extract& ci77480(gold 24k)

Tương tự như vàng, bùn khoáng làm đẹp, chống lão hóa da hiện đang được áp dụng khá rộng rãi tại các địa chỉ thẩm mỹ. Nhưng bùn khoáng ở phức hợp Niapeptygold – bộ sản phẩm DeAura D'or Mystere có nguồn gốc từ Biển Chết với hàm lượng muối và khoáng chất gấp hàng chục lần so với biển thông thường. Và theo nghiên cứu về tác dụng của bùn khoáng Biển Chết lên da từ năm 1988 tại phòng nghiên cứu Ahava Dead Sea, hợp chất này giúp cải thiện đáng kể sự trao đổi chất của tế bào, kích thích tuần hoàn máu và bảo vệ da khỏi tia UVB – nguyên nhân hàng đầu gây lão hóa da.

Còn chất Hexyl peptide-19 có khả năng kích thích việc sản sinh collagen, elastin – thành phần quan trọng trong cấu trúc da. Đặc biệt các sợi collagen mới sẽ thay thế những sợi collagen đã già cỗi, suy yếu tạo khung giá đỡ vững chắc cho bề mặt da căng mịn, săn chắc, xóa mờ mọi nếp nhăn, rãnh nhăn cũng như ngăn chặn các nếp nhăn mới hình thành. Không chỉ dừng lại ở đây, làn da còn được dưỡng ẩm sâu, bình thường hóa quá trình chuyển hóa tế bào nhờ vitamin B3 và phục hồi sức sống, trở nên khỏe khoắn, tươi tắn bởi chiết xuất thảo dược có mặt trong phức hợp Niapeptygold.

Các nhà khoa học Israel cho biết: Niapeptygold bao gồm các nguyên liệu tự nhiên quý hiếm, đó là vàng 24k, bùn khoáng Biển Chết, chất hexyl peptide-19, chiết xuất thảo dược cùng vitamin B3. Tất cả tạo thành phức hợp khắc phục các vấn đề liên quan đến quá trình lão hóa, tác động da từ sâu bên trong và bảo vệ da khỏi các yếu tố tiêu cực từ môi trường sống bên ngoài.

Đắp mặt nạ vàng vốn không còn là phương pháp làm đẹp mới mẻ với các chị em, thậm chí phương pháp này đã áp dụng từ ngàn đời nay với câu chuyện nổi tiếng về nữ hoàng Cleopatra. Tuy nhiên, vàng trong bộ sản phẩm DeAura D'or Mystere là vàng tinh khiết (độ tinh khiết thang phần nghìn đến 999) hoàn toàn lành tính với làn da và cơ thể. Không chỉ có tác dụng nâng cơ, chống chảy xệ, vàng 24k còn giữ vai trò như chất dẫn xuất, giúp các hoạt chất khác trong bộ sản phẩm DeAura D'or Mystere thẩm thấu nhanh hơn, sâu hơn vào da và phát huy hiệu quả làm đẹp tốt nhất.

PRACTICE

FRAGRANCE

Skincare products should ~~SMELL~~ great

- emotional responses to fragrance → purchase decision
 - Biotherm & their multi-million-dollar fragrance campaign for the Skin Vivo line: fragrances associated with youth
 - fragrance release through a volatile reaction of evaporation
 - skin inflammation (visible or, **more dangerously, at the microscopic level**)
 - collagen breakdown, free radical damage, healing inhibition
- one of the most common causes of allergic reactions & phototoxic response

ALCOHOL

- Products with ~~volatile alcohols~~ with cooling and quick-drying effects, esp. appealing to those with oily skin for cooling, tingling sensations felt great on skin
vs. **non-irritating fatty alcohols**: beneficial for moisturizing and stabilizing effects

FUN ACTIVITY

→ *Makeover tricks for guys*

SKINCARE PHILOSOPHY

- Realistic
- Long-term
- Minimalist
- Well-balanced
- Cost-effective
- Self-developed

REALISTIC

- Genetic factors
 - ~~What's good for the goose is good for the gander~~
→ *watch an annotation clip*
- Limited effects of topical application

LONG-TERM

- coloring & light-reflecting ingredients for immediate effects:
skincare vs. make-up

MINIMALIST

- Number of used products
 - Number of ingredients in a product
 - Single-purpose vs. multi-purpose products
- *smaller budget, shorter time, better bioavailability & greater safety*

Ngày càng nghiện mấy cái đồ #SkinCare 🥰

WELL-BALANCED

- Intrinsic vs. extrinsic components in age fighting

COST-EFFECTIVE

Ngọc Quyên

1 hr · 

Quai bị sốt 38 độ vẫn bôi trát skincare mới đi ngủ.

Lúc sau sốt cao hơn, chồng phi tới lau mát, lau sạch luôn đồng skincare vừa bôi.

Trong cơn mê man vẫn ko quên thều thào "đừng anh ơi đồ skincare mắc lắmmm" nhưng ko kịp nữa...

Chắc vì vậy mà nay ko dám sốt nữa luôn 😂

SELF-DEVELOPED

- becoming an educated user
- building an adaptable skincare routine

Ngoài chuyện da đẹp ra thì em thấy topic skincare còn có vài tác dụng nữa. Vì em ngồi tra nhiều nên giờ thuộc luôn tên với một số thành phần phổ biến và tác dụng của nó, nên mọi người cứ hỏi hoặc rủ em đi mua mỹ phẩm cùng, hoặc mang đồ nhờ em đọc rồi nhìn em với ánh mắt ngưỡng mộ. Thành ra cái không liên quan đến skincare mà em nói thì chúng nó cũng tin răm rắp.

Thêm nữa, học skincare xong thì critical thinking của em dường như cũng tăng lên. Giờ em mua cái gì, thấy quảng cáo từ bất kỳ ai trong bất kỳ lĩnh vực nào em cũng đặt ra những câu hỏi kiểu: tốt ở chỗ nào, hay ở chỗ nào? Từ đó chọn mua cái gì cũng cẩn thận và tốt hơn, không bị kiểu nghe hay quá rồi rước về.

Side effect của việc học skincare đấy là giờ em rất ngại và hạn chế ra đường vào buổi sáng, đặc biệt là hôm nào mà không kịp bôi kem chống nắng. Hay cứ đứng dưới ngoài trời lâu lâu một chút là cảm tưởng như mình đang già đi.

Nãy giờ em nói nhiều cũng chỉ để nhấn nhủ với các bạn là nếu muốn đẹp rạng ngời thì hãy học Tập dịch 😊)).

 - He had a big smile on his **face**.
 - I never want to see his ugly ~~handsome~~ **mug** again.
 - a pleasant **countenance** that puts visitors at ease
 - her smiling **countenance**
- khuôn trăng đầy đặn nét ngài nở nang?

STRUCTURES

- khuôn trăng đầy đặn nét ngài nở nang?
 - her plump countenance and curvy contour

STRUCTURES

- **In all honesty**, a number of these creams are used as placebo effects.
- **to be honest** [N] vs. **TBH** [I, abbreviation] vs. **in all honesty** [N→F] vs. **speaking truthfully** [F]
 - **To be honest**, the house is not quite our style.
 - I don't know anything about it, **TBH**.
 - **In all honesty**, the book was not as good as I expected.
 - **Speaking truthfully**, I love you more than you love me.
- **honest** vs. **sincere**

FOOD FOR THOUGHT

HONEST

fact

vs.

SINCERE

good will

- I **honestly** don't want to be his business partner, but I **sincerely** hope his company succeeds too.
- When you say "*Everything's going to be okay*", you are being **sincere** but probably not **honest**. By contrast, you can be **honest** without being **sincere**, esp. when you are **brutally honest**.
- **in all honesty** vs. **in all sincerity**: **nói thẳng ra** vs. **thực lòng mà nói**
 - Your book isn't, **in all honesty**, as good as I expected. But **in all sincerity**, I didn't mean to break your confidence.

STRUCTURES

- a number of these creams are used as placebo effects.
 - The placebo effect is the fact that some patients' health improves after taking what they believe is an effective drug but which in fact has no physical effects.
→ *watch sample clips*

STRUCTURES

- [IELTS tips] **pseudo-** [A, ON] vs. **quasi-** [A, N]
 - **pseudo**-science vs. **quasi**-scientific explanation
 - **pseudo**-legal drugs such as marijuana vs. the **quasi**-legal language that may cause research subjects to think they have signed a legal document

STRUCTURES

- When it comes to anti-aging promises, it's very **gray area**.
 - Most of these problems are in the **gray area**, without **black or white** solutions.
- There's a great deal of **smoke and mirrors** at that stage.
 - The revised economic plan is free of the **smoke and mirrors** that have characterized earlier budget plans.

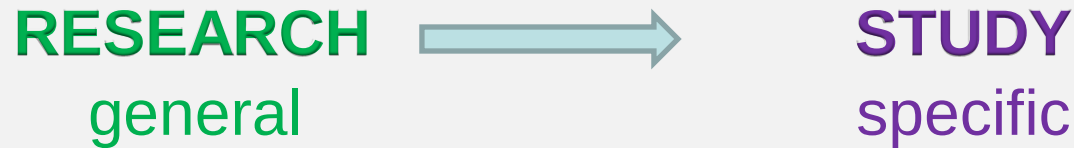

STRUCTURES

- They are **under no obligation** to prove that.
- **do not have to** do something $[I \rightarrow N]$ vs. be **under no obligation** to do something $[N \rightarrow F]$
 - They **didn't have to** pay tax.
 - You are **under no obligation** to buy anything.

STRUCTURES

- **research** [N] vs. **digging** [I→N] vs. **investigation** [N→F]
 - He has carried out extensive **research** into renewable energy sources.
 - We did some **digging into** the data to provide you with a picture of who is buying art and what they are buying.
 - The Pragmatics of Translation in Journalism: an **Investigation** [title] **into** the Nature of Translation in the News Room
- **research** vs. **study**

FOOD FOR THOUGHT

- An Overview of ~~Research~~ ~~Study~~ into the Teaching and Learning of Probability
- Several ~~studies~~ ~~researches~~ were done to show the effects of this special fruit juice.

STRUCTURES

- In general, beauty supplements don't live up to the hype.
 - The boss had no intention of living up to his promise.
 - He failed to live up to his parents' expectations.
- không rửa được tiếng xấu?
 - unable to live down (a bad reputation)

STRUCTURES

- In general, beauty supplements don't live up to the **hype**.
- **publicity** [N] vs. **hype** [I, ON] vs. **public acclaim** [N→F, OP]
 - Despite receiving a lot of **publicity** over the past few years, the show seems to have faded away.
 - Don't believe all the **hype**—the book isn't that good.
 - **Public acclaim**, generated through record sales and social media exposure, play a predominant role in this.

STRUCTURES

- You can pretty much claim a lot of things that aren't **substantiated** in science or in proof.
- [IELTS tips] **prove** [N] vs. **bear out** [I→N] vs. **substantiate** [F]
 - The prosecutor used DNA evidence to **prove** the defendant's guilt
 - Scientific evidence **bears out** the claim that stress and disease are linked.
 - The last study has provided no evidence to **substantiate** this conclusion.
- vs. The huge improvement in our service is **evidenced by** [F] recent customer surveys.
- These emails are still circulating, **as evidenced by** my receiving one just this morning.

STRUCTURES

- Major muscles like the heart, diaphragm, and brain are the **first on the list**.
- **priority** [N] vs. **first on the list** [I→N] vs. **precedence** [N→F]
 - The search for Covid-19 vaccines will be given **priority over** all other medical research.
 - Safety should have | take **precedence over** all other matters in the workplace.
- theo thứ tự ưu tiên?

STRUCTURES

- theo thứ tự ưu tiên?
 - Please present your reasons in/by order of priority.
 - They were received by the king in/by order of precedence.

STRUCTURES

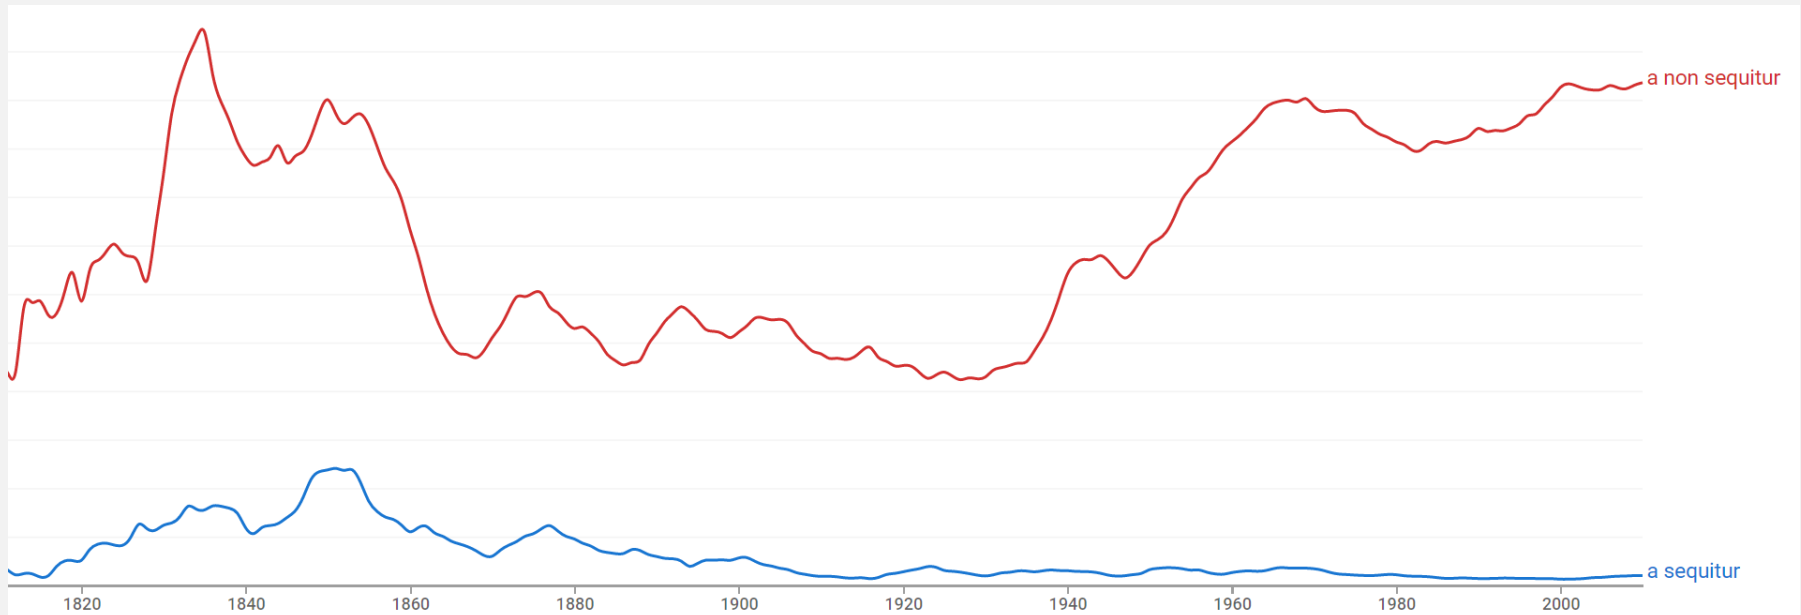

- The **takeaway**: Sipping on collagen supplements daily isn't a reliable route to better skin.

[IETLS tips] **conclusion** [N] vs. **takeaway** [I→N] vs. **sequitur** [F]

- The **conclusion** drawn from the article is that the church could provide moral guidance in solving global problems.
- One of the main **takeaways** from this informative skincare session is that: you can pay less for more.
- A reasonable **sequitur** from the announcement is that you'll be leaving the company

STRUCTURES

- **conclusion** [N] vs. **takeaway** [I→N] vs. **sequitur** [F]
- [IETLS tips] His argument that there must be a connection between behavior and physical appearance is a complete **non sequitur**.
 - There appears to be a **non sequitur** - the beginning of that question does not relate to the end - and I cannot see the connection at all.

STRUCTURES

- The answer to the **quest for** beautiful skin is found in a Japanese brewery.
- **search** [N] vs. **pursuit** [N→F] vs. **quest** [L] **for/of** something
 - a **search for** food | go **in search of** help
 - the **pursuit of** knowledge | his determination **in pursuit of** his goals
 - the **quest for** happiness | He set off **in quest of** truth

FOOD FOR THOUGHT

search < hunt

- Hundreds have joined a police hunt for the missing teenager.
 - The hunt for a cure for Covid-19 continues.
- Fun question: *tìm zai*?

STRUCTURES

- [IELTS tips] There are other important factors at play that are responsible for healthy-looking skin.
 - [figurative] There are a number of factors at play here.
 - [literal] the happy sounds of children at play

STRUCTURES

- Your secret is safe with me.
- Age is (just) a number. Who cares how old he is.
vs. Numbers don't lie.

HOMEWORK

- Session 24
 - SKINCARE
