EXAMPLE-CONCEPT RELATION

Idiom (CONCEPT: MARRIAGE)

Hung Alex

28. Em chào thầy ạ, thầy cho em hỏi "lương duyên trời định" thì dịch tiếng Anh như nào thầy nhỉ? Em cảm ơn thầy ạ. Context là VN vừa nâng cấp quan hệ lên đối tác chiến lược toàn diện với Nhật Bản, và dùng cụm từ này để chỉ mối quan hệ ấy. Em chỉ nghĩ được đến "preordained destiny" hoặc báo TTXVN thì dùng "predestined connections," nhưng nó vẫn bị tắc chỗ "lương duyên" thầy ạ.

EXAMPLE-CONCEPT RELATION

Idiom (CONCEPT: MARRIAGE) 

- It is a **marriage made in heaven**.

Hồ Lê Vũ

Hung Alex "lương duyên trời định" là một cụm từ [O] & [L] trong tiếng Việt. Tiếng Anh tương đương có lẽ là "a match/marriage MADE IN HEAVEN".

Trong ngữ cảnh em hỏi thì nên thay match/marriage bằng, ví dụ PARTNERSHIP/COLLABORATION/ et.c, và để cụm "MADE IN HEAVEN" trong ngoặc để hàm ý mình dùng theo nghĩa bóng.

ceX and T-Mobile have launched a big partnership.

Unlike many big consumer-facing partnerships, this one isn't just about sales. This is a true partnership from top to bottom.

It involves co-innovation - both companies redesigning their technology to enable brand new use-cases and services neither can offer alone - co-marketing, and co-selling.

Let's look at a couple of examples: You notice the emotion of discomfort while at a party as your stomach clenches and your breathing gets constricted. Then your mind labels that as feeling awkward because perhaps you don't know many people there, or you just saw an ex-boyfriend. Yet another person with those same emotional bodily sensations, however, might label the experience as exciting because they get to meet new people or see their ex again.

EMOTION → FEELING

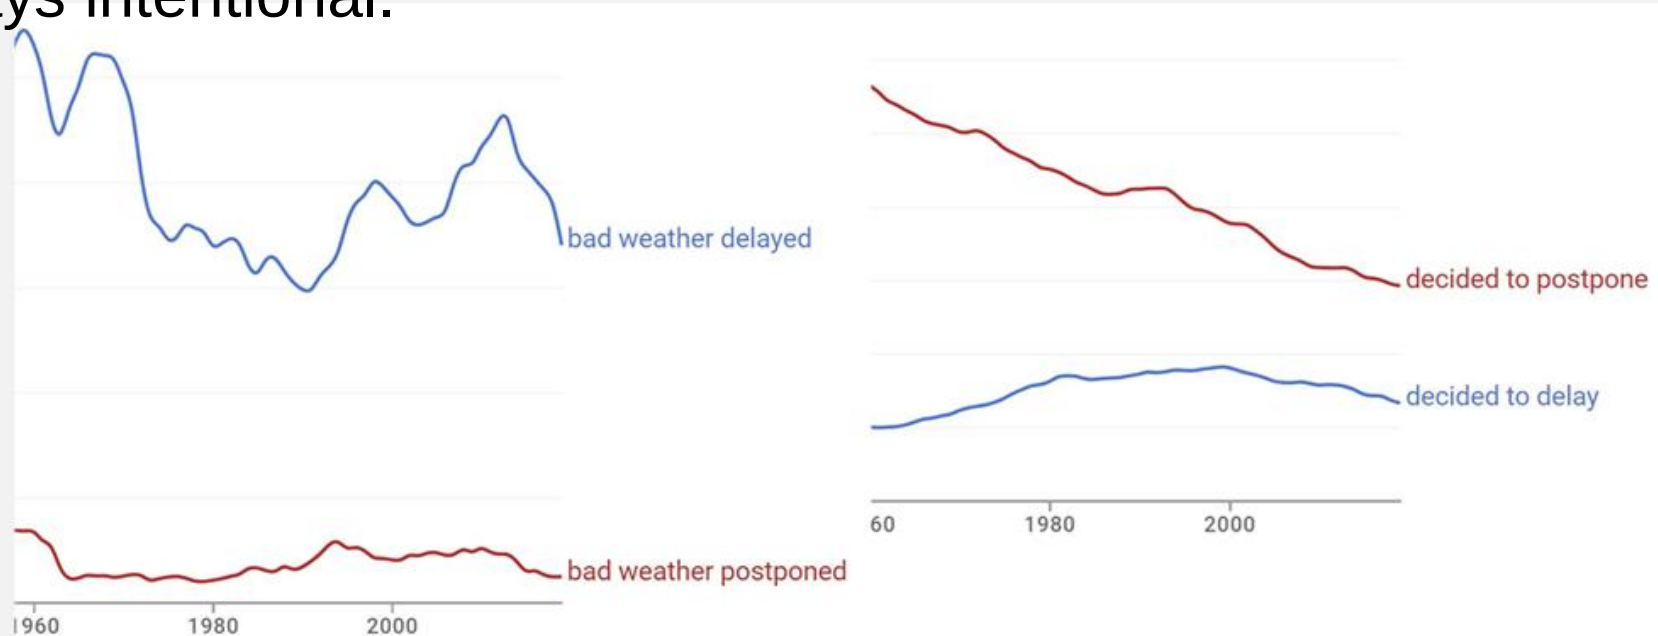

- Emotions could be conscious or subconscious (= unfelt). Feelings are always conscious.
 - 'I'm really upset about my IELTS scores.'*
 - 'I know the feeling ~~I know the emotion.~~'*

EMOTION → **FEELING**

DELAY → **POSTPONE**

- **Emotions** could be conscious or subconscious (= **unfelt**) **feelings** are always conscious.
- **Delay** could be accidental or intentional but **postponing** is always intentional.

Trang Dang Em xin review một chút về phần mềm PVO.

Em bắt đầu sử dụng phần mềm sau khi nghe thầy giới thiệu trong lớp Tập, bắt đầu bằng việc tổng hợp và sắp xếp toàn bộ từ vựng sau mỗi buổi học Tập thành các topic phù hợp với tư duy của em cộng với link các cụm từ/từ đồng nghĩa trái nghĩa với nhau (PVO có chức năng tuyệt vời này), sau đó lần mò tổng hợp cả từ vựng của khóa Ngọng đã học trước đó nữa. Thừa thắng xông lên, em còn dùng PVO để tổng hợp từ tiếng Anh chuyên ngành phục vụ cho các môn học đại học của mình.

Thời gian công sức bỏ ra để phát triển thư viện PVO khá nhiều nhưng được cái kết quả đạt được vô cùng hài lòng. Thứ nhất là em nhớ và có thể vận dụng phần lớn từ vựng học được từ các lớp Ngọng và Tập một cách đáng ngạc nhiên (có lẽ do đã hì hụi dành thời gian phân loại từ, tìm clip hoặc meme liên quan). Thứ hai là em có thể tìm kiếm lại từ vựng mỗi khi cần viết luận theo chủ đề vô cùng nhanh chóng hiệu quả (theo chủ đề, theo tone, theo đồng nghĩa trái nghĩa, theo keyword, vv). Thứ ba là khi em cần tư liệu (clip, thơ, văn, meme, vv) để dạy thêm tiếng Anh cho đàn em (ruột thịt họ hàng thôi chứ em không có chuyên sư phạm tiếng) thì đều có thể tìm dễ dàng. Em trân quý thư viện PVO mình tạo ra đến mức đã back up lên cả Onedrive, Google drive và Dropbox, rồi còn lưu trong hardrive nữa. Mỗi tháng lại update các bản back up 1 lần.

Thêm một điều nữa, sau khi học được 2/3 của Tập I, em cực kỳ ấn tượng với kiến thức và sự logic của thầy. Với phần mềm PVO, em đã "mạn phép" thử nghiệm sử dụng với mục đích hơi khác, đó là lưu trữ các kiến thức chuyên ngành của em. Em lưu tên bệnh là một concept, các triệu chứng là example (describe), các thể bệnh là a part of,... Điều trùng hợp là một triệu chứng có thể là biểu hiện của nhiều bệnh khác nhau, nên em link nó với các concept khác nhau, và hình thành một sơ đồ cây với linking giữa các bệnh, nhóm bệnh. Tất nhiên hiện em mới thử nghiệm và còn nhiều điểm chưa phù hợp, nhưng nó giúp em khá nhiều trong việc tổng hợp kiến thức và ghi nhớ các từ vựng chuyên ngành. Thực sự em đã nghĩ tới xây dựng một phần mềm chuyên ngành về y học dựa trên ý tưởng PVO của thầy. Nếu có ngày đó (tương lai xa), em sẽ xin phép thầy và thực hiện các thủ tục bản quyền cần thiết.
